**OWL is a Barcelona-based design studio led by Alfredo Lopez, which designs and manufactures unique furniture and objects, mainly but not exclusively in wood. As a practice, OWL understands its furniture collections as series and therefore objects in constant evolution, which allows them to adapt to different people, projects and spaces.**

**Each of our pieces are handmade and built in our workshop, using high-quality materials from local suppliers as a means to be conscious and sustainable, with the aim of creating pieces that stand the test of time. We source materials based on each commission, which may lead to some minor differences in the tone, color, and thickness of the finished piece.**

La Pepino is a collection of seating variations, built on the repeating pattern of cylindrical cushions, and supported by an organically shaped base. Every piece comes fully upholstered in customisable fabrics, and plays with the different points of contact between cushion and body.

One variation of the collection (chaise and ottoman) comes with a metal base, which is visually lighter than its plywood counterpart. In this variation only the cushions are upholstered, and depending on the chosen fabric, it becomes suitable for outdoor seating.

The Alabaster Series has grown from early explorations with the material in our workshop, initiated by the desire to experiment with a material not commonly used in furniture today. Bringing in contemporary ways of working, the Alabaster series reduces the material to its raw essence while alluding to its rich history of ornament and sculpture.
